

Soundproof windows

High performance customized solutions

All our products offer the best of Italian design

Soundproof windows with sound-insulation of 40 dBs. Available on standard or bespoke measures for several uses.

Soundproof windows

High performance customized solutions

Use

Recording studios, rehearsal rooms, broadcasting, medical clinics and studios, hospitals, offices and every kind of room with a specific need of sound-insulation.

Composition

The window has a white PVC frame with high acoustic properties. The window has specific anti-noise double-pane glass.

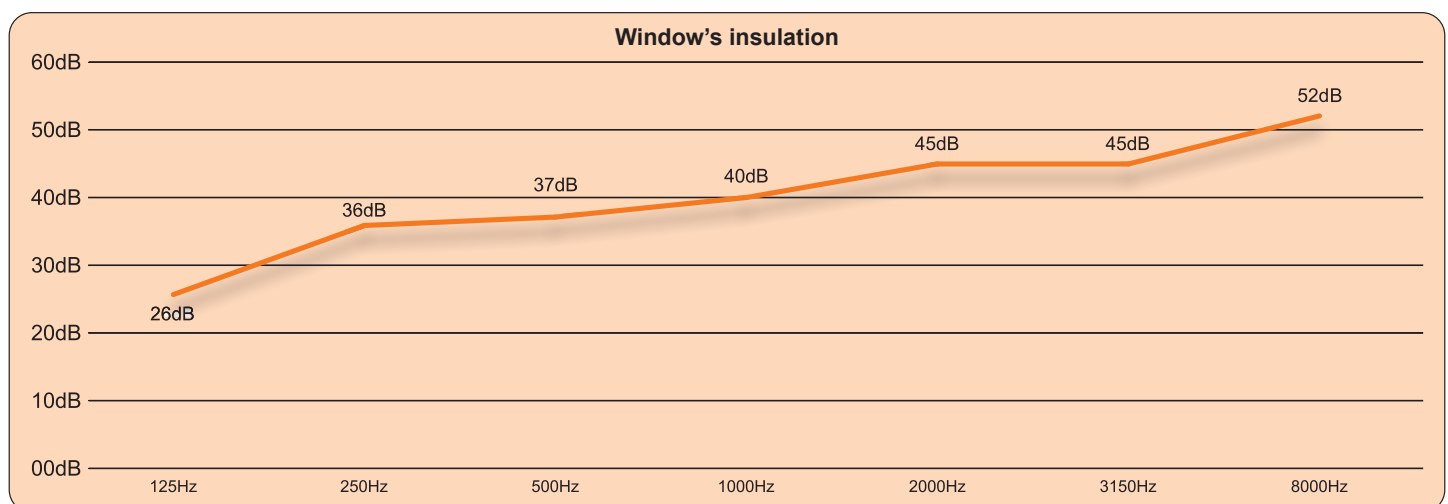

Double window

In rooms with a high insulation, it is recommended to install two windows on both sides of the wall to improve the soundproofing properties.

Dimensions

The windows can be custom-made with a frame up to 70x90 cm (glass 60x80 cm). Any special measure can be evaluated. The window's weight is 50 kg/sq.m.

Standard reference: acoustic insulation tested according to the norm ISO 717-1

Optional

- Bespoke sizes

Packing and delivery

The window is packed and shipped in a wooden crate. It can be delivered and installed with DIY kit or by our specialized staff if required.

Installation

The window can be installed on any type of wall (masonry or plasterboard). It is necessary to prepare the supports for fixing.

The installation can be done following the instructions provided.

Notes

The specifications can be subjected to changes without notice. Warranty: as per law.
